AXSYS VIRTUAL ACADEMY

POWERASSIST
DISTANCE LEARNING

Introducing the new Distance Learning POWERASSIST Mastercam training class from the Axsys Virtual Academy.

POWER-ASSIST is self-paced training providing options for training new users without requiring the rigid schedules and travel requirements of a formal, face to face training facility. This is especially important now in wake of the COVID-19 pandemic.

Enjoy the advantages of honing your Mastercam skills in a safe, remote location while enjoying the benefits of interacting with a Senior Tool Maker as instructor.

Students enrolled in the Mastercam Mill 2D POWERASSIST PROGRAM receive access to online Mastercam University training and will:

- Learn Mastercam at their own pace
- Receive four, 1-hour on-on-one sessions with a Senior Axsys Instructor specific pre-defined break points during the 12-lesson
- Have the opportunity to address specific questions.
- Broadening their knowledge of Mastercam beyond the scope of Mastercam University's online self-paced training

ACT NOW LIMITED TIME
Receive 50% OFF any Single Class Mastercam training offerings or the balance of 2020
