

# The Trusted Authority in Digital Manufacturing

Supporting Digital Manufacturing With High-Quality Products and Unequaled Support.

Axsys Incorporated is an independent professional services company focused on providing the best possible hardware and software technology along with industry-leading training and support services specifically for the design, manufacture and inspection of products, parts and tooling.

For over two decades, Axsys has been the leading integrator of CAD/CAM solutions to the engineering and manufacturing communities. Axsys provides complete solutions by integrating operating system, application and enterprise software, as well as hardware ranging from workstations to machine tools and inspection devices.

# ABOUT AXSYS INCORPORATED

*Axsys Incorporated provides digital technology solutions from the leaders in CAD/CAM software. For over 25 years Axsys has helped literally thousands of clients in every industry, from one-man shops to Fortune 500 companies, successfully implement sophisticated CAD/CAM/CNC systems, increase productivity and realize greater profits. Axsys couples this unique capability with experienced manufacturing and tooling professionals to provide our clients with a distinct advantage—the Axsys Advantage.*

*Our associates have been involved in digital manufacturing since 1978, long before anyone ever heard of CAD/CAM. It's in our blood— a large part of our DNA.*

Since the days of Numerical Control in the mid-1970's, long before anyone heard of CAD/CAM, we have been involved in virtually all aspects of computer aided manufacturing (CAM).

We have extensive experience with virtually every type of CNC machine tool from a wide range of machine tool builders and distribution partners. We have been serving a multitude of industries designing, programming and machining products, large and small including: molds, dies, patterns, fixtures, production parts and castings made from an endless list of hard, soft and exotic materials.

## Solutions Partners

Axsys combines quality products along with tooling and experienced industry sales and support specialists to provide complete profit making solutions to our customers.

Each solution partner is carefully selected by Axsys to assure we represent market leaders with products of the highest quality that provide the best value for our customers across all markets and applications.

## The Worlds Most Popular CAM Software

Axsys provides industry-leading Mastercam CAD/CAM Software Solutions that enable manufacturers to

design and manufacture parts and tooling from virtually all industry segments.

Mastercam offers CAD/CAM software tools for a variety of programming needs, from basic to complex. Due to our innovative, flexible solutions and top notch network of support, our software is the most widely used in industry and education. Choose Mastercam to streamline your production process from job setup to job completion.

## Post Processor Support

Axsys provides in-house post processor development to provide the necessary post processors for our software solutions for any machine tool/control that you may have. This service assures maximum utilization of your machine tools in the shortest possible time.

Regardless of application, our goal is to deliver a post processor for you in the shortest possible time frame that requires no editing by the operator. Our Post Processor Department has delivered hundreds of post processors and has an extensive library of post processors for applications ready for delivery to our customers.

## Our Services

One of the key components in successful implementations of technology is the partner you choose to supply you with the

technology and just as importantly, implement and support you in the ongoing use of the technology in your company.

Our extensive in-house technical resources have hundreds of man years of experience putting CAD, CAM and CNC solutions to work for literally thousands of customers. This allows us to draw on a wide range of industry and systems experience while supporting you in the use of our products.

- On-site, help desk and web-based support.
- Sophisticated software analysis tools enabling remote development and debugging of machining operations.
- Regularly scheduled, topic-focused Workshops to "hone" user skills and increase productivity.

## Training

We take training very seriously. Axsys ensures that your organization maximizes its investment in software technology with world-class training.

Whether training is held in one of our two training labs, at your site, or through one of our distance learning offerings, we focus on real-world applications.

When your organization has unique requirements, Axsys will develop custom classes to address your specific needs.

### Information Technology & Systems Integration

What if your solution partner was versed in all layers of all systems within an organization - from the physical hardware to the operating systems, applications, databases, storage, servers and more.

### CAD/CAM Software Development & Support

Imagine if your support partner actually had over 30 years of extensive experience developing, supporting and training CAD/CAM software and using it in production.

### Machining and Manufacturing

Imagine having a partner whose sales, service, and management had over 900 man-years of extensive machining and manufacturing experience across many industries.

## Axsys Incorporated A Solution Partner Like No Other
